SUMMARY

Game developer with experience in C++, Unreal Engine 5, and full-stack tools like React and Tailwind. Passionate about interactive experiences, performance optimization, and visually polished gameplay.

SKILLS

Game Engines: **Unreal Engine 5**
Languages: **C++**, Python, TypeScript
Frontend: React, Tailwind CSS
Tools: Git, GitHub, VSCode, Figma

PROJECTS

Unreal Engine 5 — **Unload - WIP Shooting Game (GameSpawn Club)** — **Github**
Implemented core gameplay systems (using Blueprints) including player health bar, damage handling, and shooting mechanics; collaborated with a 10 person team on overall level design and playtesting.

Unreal Engine / C++ — **Simple Shooter Project** — **Personal Project**
Extended GameDev.tv's Simple Shooter project by implementing a custom reload mechanic with UI feedback and keybind logic, and developing a functional main menu. Focused on gameplay scripting, input handling, and UI integration in Unreal C++.

React / Typescript — **ACM Website** — **Github**
Collaborated with a 15-member team to redesign and implement ACM@UCR's official website. Developed interactive front-end components, dynamic functionality, and responsive layouts. Leveraged Next.js, Tailwind CSS, React, and Figma to ensure high-quality, maintainable code and cohesive design.

React / Typescript — **Portfolio Website** — **Live Site**
Designed and developed a personal portfolio site to showcase game development work. Built with React and Tailwind CSS, focusing on clean UI/UX, component modularity, and responsive design. Demonstrates technical ownership, attention to visual polish, and self-driven project completion.

EXPERIENCE

10/2024 – Present — **Student Assistant** — **UCR CS Department**

- Assisted in grading programming assignments and exams for undergraduate computer science courses.
- Reviewed and tested student Python code for correctness, style, and efficiency.
- Collaborated with instructors and other readers to ensure consistent grading standards and timely feedback; followed Agile-style weekly meetings to coordinate tasks and track progress.

`Python`

EDUCATION

Expected 2027 — **Bachelors of Science, Computer Science** — **University of California, Riverside**
Relevant Coursework: Graphics – CS130; Systems – CS161, CS153; Software Development – CS100; Hardware – CS120A; Algorithms – CS141
